# Welcome to the Top 50 Consultancies League Table

Created in collaboration between Barbour ABI, Association for Consultancy and Engineering and UK Construction Week 2024.

## About Barbour ABI

Barbour ABI is the market leading provider of construction leads and intelligence with the largest UK-based team of researchers and experts in our industry. The power and depth of Barbour ABI information is unrivalled as we make more calls, more connections and add more value to project information than any other company in the UK. We support companies involved at any stage of the construction process by helping them win more work and generate more new business. That's why we count everyone from recruiters and insurers, to specialist contractors and product manufacturers as our valued customers.

Barbour ABI is the chosen provider of industry data and indicators for Government bodies including the Office for National Statistics and the UK Government's National Infrastructure and Construction Pipeline, which outlines future construction and infrastructure projects where public funding is agreed. Barbour ABI also provides data for independent organisations, such as the Construction Products Association.

## About Association for Consultancy and Engineering (ACE)

The Association for Consultancy and Engineering (ACE) champions infrastructure and the built environment to government and other stakeholders, representing the views of around 400 members.

Our members employ over 60,000 in UK and 250,000 worldwide, contributing more than £15 billion to the UK economy. However, the buildings they create actively contribute over £570 billion a year of GVA.

Our Board is responsible for the strategic direction and corporate development of the organisation and meets four times in a year. Members are representative of our membership body and a different chair is elected each year.

ACE's groups and advisory councils provide our members with local networking opportunities, help establish our opinion and policy and explore interests of critical importance to our members' business interests, no matter their size.

## About UK Construction Week

Simply put it is the UK's leading built environment trade event, but it is so much more...

In the dynamic realm of construction, staying abreast of the latest innovations, technologies, and industry trends is crucial for success. One event that stands out as a cornerstone for the construction industry in the United Kingdom is UK Construction Week (UKCW). Since 2015, this biannual gathering in May and October is a hub for professionals, companies, and educators to converge, exchange ideas, and explore the cutting-edge developments shaping the future of construction.

At its core, UKCW serves as a nexus for professionals from diverse segments of the built environment sector to connect and collaborate. Architects, builders, contractors, suppliers, and other stakeholders come together under one roof, in the capital and the midlands, fostering an environment conducive to relationship-building. The event provides a unique opportunity for individuals to forge new connections, strengthen existing partnerships, and explore potential collaborations that can lead to mutually beneficial ventures.
